

Your Trusted Partner in Food Production Hygiene

Avanti Hygiene supports UK food production and processing facilities with top-tier cleaning, hygiene and safety solutions tailored to your unique needs to ensure cleanliness and compliance.

Discover how Avanti can elevate your facility's hygiene standards.

Boosting hygiene and sustainability strategies

In the food production and processing industry, maintaining impeccable hygiene standards at every stage of the food production and supply chain process is not just a regulatory requirement—it's essential for ensuring product safety for consumers, protecting your workforce and safeguarding your brand's reputation.

Avanti has significant experience supporting food factories, ingredients manufacturers and ready-to-eat food brands in all these areas.

We do so by helping our clients to achieve clarity and control of hygiene planning in four areas:

1. Maintaining Cleanliness and Sanitation:

Ensuring all production areas, equipment, and surfaces are thoroughly cleaned and sanitised to prevent contamination.

2. Protecting Your Workforce:

Providing high-quality PPE and disposables to keep staff safe and compliant with industry standards.

3. Ensuring Compliance and Efficiency:

Supporting your facility's adherence to HACCP, BRC Global Standards and other regulatory requirements while optimising cleaning processes to reduce costs and waste.

4. Sustainability Commitment:

Implementing eco-friendly products and practices to reduce your food facility's environmental footprint and promote sustainable operations.

In case it isn't clear by now, we don't just sell cleaning products—our approach is to work collaboratively with each client to assess their current and future needs, identify gaps and opportunities for improvement, savings and sustainability gains, and help them find the perfect recipe for cleaning and hygiene strategies that deliver.

How Avanti Hygiene Helps

Knowledgeable support:

Our food business sector is headed up by Rachel Connor, one of Avanti's two directors. As a MCIPS qualified procurement professional with a strong background in the food industry, she brings significant personal knowledge and direct experience to her support of food sector clients. Having graduated from Oxford University with a degree in Spanish and Italian, Rachel went on to work for global food ingredients company Kerry, in Supply Chain and then Purchasing. After 7 years there the call of Avanti became too strong to resist and she decided to join the family business, swapping food ingredients for toilet rolls. However, even before she and brother Brad Hunt took over the business, Avanti had long experience in the sector. That's why we truly understand the specific hygiene and safety challenges faced by food production facilities.

Comprehensive capability:

Avanti serves its customers from an inventory of more than 3000 cleaning and hygiene product lines, which include many food-sector specific solutions. The range expands continuously. From food-safe blue paper rolls and disinfectant wipes to production-safe hygiene equipment and metal detectable stationery, our extensive product range means we can create complete solutions for food businesses.

Sustainability commitment:

Aligned with our mission to create clean, safe, and sustainable spaces, Avanti Hygiene will look at your products and systems to identify areas where we can help your facility reduce its environmental footprint. We are on our own sustainability journey and are a Planet Mark Certified Business. We preferentially select sustainable suppliers and products whenever possible, and relish helping clients take huge sustainability steps while gaining cost savings in the process.

Support and Partnership:

We don't just supply products; we partner with you to develop tailored hygiene strategies that enhance your operational efficiency and maintain high standards of cleanliness and safety in food production, processing and handling.

You will be supported by an Account Manager to oversee all aspects of our partnership, including showing you new products and identifying areas to reduce spend, increase efficiency or enhance sustainability.

Place: Hygiene Solutions

Dispensers and Refills:

Tork Washstation Basic Paper 1ply Blue 130002 (6x250m)

Food contact certified, extra-long roll for high-volume food processing environments.

Tork Washstation Dispenser

High capacity dispenser improves hygiene in food production areas and one-at-a-time dispensing keeps cost and waste down.

Maintaining Pleasant Toilet Environments:

Tork Constant Air Freshener Dispenser Aerosol-Free

A propellant-free system for continuous long-lasting scent dispersal for a pleasant washroom experience.

Tork SmartOne Twin Mini Toilet Roll Dispenser

Efficient and robust dispensing system suitable for high traffic washrooms, reduces consumption by up to 40% compared to traditional jumbo roll and reduces blockages.

Comprehensive range of the most advanced cleaning tools available, in up to 12 colours ensuring optimal cleanliness for food industry.

Custom-designed Shadow Boards

Keep your cleaning tools organised and within easy reach with our bespoke shadow boards. Designed for 5S principles, they maximise efficiency and productivity.

Sustainability

Avanti is committed to offering its customers more sustainable choices and solutions for every day cleaning and hygiene needs.

Our commitment to sustainability is reflected in our product selections, such as Evans e:dose Super Concentrates, that reduce plastic waste and carbon emissions from transport. We are a major distributor of Tork paper and washroom solutions including products that are FSC and EU Ecolabel certified, and offer a range of systems designed to reduce paper consumption and waste including hand towels and toilet paper for single-sheet dispensing. Many of the dispensers themselves are also now carbon neutral.

Did you know that 75% of adults in the UK worry about climate change?¹ But lots of people also worry about greenwashing—saying something is sustainable when it isn't. We are working with Planet Mark to prioritise data integrity and to ensure we are cutting emissions across all areas of our business operations. Planet Mark provides us with third-party verification and holds us accountable by requiring us to make carbon emissions reductions to re-certify. We will then be able to talk confidently about the actions we are taking to reduce our environmental impact and improve our impact on society.

We are engaging actively with all our manufacturers and supplier brands to understand their commitment to ESG and how they are working towards a more sustainable future, to the benefit both of our customers and the planet we all share.

Proven Food Business Partnerships

Trusted by Leading Food Industry Brands

Avanti Hygiene has a proven track record of supporting some of the UK's most reputable food production and processing companies. Many customers have partnered with us for over a decade, some for up to 18 years. Such long-term partnerships are a testament to our commitment to quality, reliability, and exceptional customer service.

Indigo Food Group

Avanti has been supplying IFG, a group of food manufacturing companies offering an extensive range of cooked meats, chicken and savoury pastry products as their hygiene and PPE partner since 2010. We work closely with their Hygiene, Technical and QA teams in 3 UK sites. In addition to ensuring hygiene and safety by offering quality products at competitive prices with a quick lead time (which is a given), there is an emphasis on responsiveness, innovation, flexibility and a 'can do' attitude which underpins the relationship.

Plant-Ex Ingredients

Plant-Ex Ingredients is an international company specialising in the manufacture of Natural Food Ingredient Solutions. Avanti has worked closely with the Plant-Ex Team since 2011 as their key partner for hygiene and safety supplies. Avanti is a true one-stop shop for Plant-Ex, supplying hygiene equipment, chemicals, paper disposables, gloves and disposable PPE, refuse sacks, hand hygiene and more into their Bristol warehouse along with the backup and support of a dedicated Account Manager who is always available for site visits.

Real Wrap Co

Bristol-based Real Wrap Co provides top-quality food-to-go, with a stated aim to be as ethical and sustainable a sandwich supplier as possible. We were called on to supply a wide range of hygiene equipment ahead of an impending audit and could deliver the complete range of cleaning equipment from market-leading brand Hillbrush at very short notice. Hillbrush has been making brushes and cleaning equipment for over 100 years and today operates from a state-of-the-art facility in Wiltshire, UK. Hillbrush is proud to be the only UK manufacturer of colour coded cleaning equipment and brushes for food manufacture, and both Real Wrap and Avanti are glad to be partnering with a local supplier and thus minimising the carbon impact of delivery.

Join our family of satisfied Avanti customers today—let us help you sustain standards and find new savings through appropriate and sustainable food production and facility hygiene strategies.
